

**The London Hand and Wrist Unit**  
**LHWU**

**Platinum Medical Centre**

**We Have Moved**

We are very excited to announce that the London Hand and Wrist Unit has moved from the Wellington South building to The Platinum Medical Centre (PMC), This facility is the UK's largest private diagnostic and outpatient centre and is located on Lodge Road in St Johns Wood.

This dedicated outpatient and day case centre is one of the biggest developments in the independent healthcare sector since the mid 1980s. The PMC is arranged over seven floors, including a sub-level floor dedicated to an advanced suite of diagnostic imaging equipment. The London Hand and Wrist Unit is located on the first floor and our bright and spacious treatment area provides a comfortable therapeutic environment for patients and staff.

We have 2 private treatment rooms and a custom designed open plan treatment area. These are located beside 3 state of the art consulting rooms meaning efficient and smooth patient flow between consultants and therapists.

We are enjoying our new surroundings and look forward to developing the London Hand and Wrist Unit in our new world-class facility.
